

You can use the app as following:

We created an admin user to manipulate participants and emails :

Username : admin

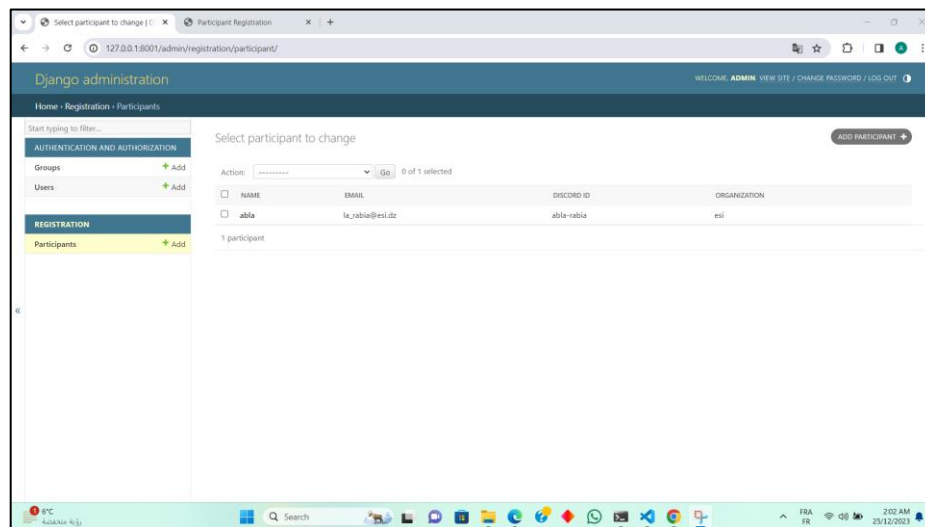

password : 1234

you can access to the admin panel from the link :

<http://127.0.0.1:8000/admin/> // it will change depending on the port ...Ofc

then enter the username and password.

After that , you can take a look at the list of participants, when a participant registers , you can find him in the list of participants:

And you can send email with the Actions list.
